

Greetings, and thank you for forming this important group to discuss how to best serve Medical Cannabis Patients!

I have worked as a Cannabis Clinician for the past 8+ years, designing patient care platforms, curriculum to train patients and professionals, and a vetting process for CBD. I have served as the Treasurer of the American Cannabis Nurses Association, and Director of Health for Los Angeles NORML for the past 3 years. I'm a Continuing Education Provider for the Board of Registered Nursing and a member of the Coachella Valley Cannabis Alliance Network.

My question is; How will the CAC help us build a Medical Door to the Industry? Adult use has captured the focus and patients struggle to find safe, affordable medicines. I am eager to contribute in laying the groundwork. Thank you, Elisabeth Mack
