

Subcommittee Recommendations: March 2023

The Cannabis Advisory Committee (CAC) reviews recommendations adopted by subcommittees and considers whether these recommendations should be adopted by the full membership of the CAC.

During its March 2023 meeting, the CAC will review and consider the following subcommittee recommendations, which were adopted from January to March 2023:

Cultivation Subcommittee:

- **Subcommittee Recommendation 1:** Recommend that DCC provide a simple and immediate pathway to cultivators that allows a cultivator to fallow all or a portion of their mature plant canopy area at a reduced and/or prorated rate, so that the following request may be retracted should the cultivator choose to plant.
- **Subcommittee Recommendation 2:** Recommend that DCC provide a simple and immediate pathway that allows a cultivation license holder to reduce the type and/or size of their cultivation license permanently without requiring a new application submittal or a new application review process, so long as the proposal for the permanent downscaling of the cultivation license does not increase environmental impacts, does not propose additional activities, does not propose a reconfiguration of the premises, and does not propose new development.

Equity Subcommittee:

- **Subcommittee Recommendation 1:** Recommend to the main CAC that DCC conduct a statewide social equity assessment to collect data statewide.
