## Discussion Topic: Combined Activities License (CAL)

[Senate Bill 1064](#) established a new license type, the combined activities license, which allows a business to conduct two or more commercial cannabis activities under a single license at the same premises, excluding laboratory testing.

The Department is in the process of defining the CAL and is seeking input.

### CAL Activities

The Department is considering creating a specific list of qualifying activities:

<u>Cultivation</u>	<u>Manufacturing</u>	<u>Distribution</u>	<u>Retail</u>
<ul style="list-style-type: none"><li>• Indoor*</li><li>• Outdoor*</li><li>• Mixed-Light*</li><li>• Nursery*</li><li>• Third-Party Processor</li></ul>	<ul style="list-style-type: none"><li>• Volatile + CO2*</li><li>• Non-Volatile*</li><li>• Edibles + Infused Products*</li><li>• Third-Party Packaging &amp; Labeling</li></ul>	<ul style="list-style-type: none"><li>• Full (Testing)</li><li>• Transport-Only + Storage Services</li><li>• Transport-Only (Self-Distro)</li></ul>	<ul style="list-style-type: none"><li>• Storefront + Delivery</li><li>• Delivery Only</li><li>• Event Only Retail</li></ul>

Businesses may select the required two activities from the same category or different categories (cultivation, manufacturing, distribution, or retail).

“Transport-only (self-distro)” and “event only retail” must be paired with at least one of the asterisked (\*) production activities.

### Discussion Questions

- Are there any additional activities that should be included, or any listed activities that should be removed?
- Are there any activity combinations that should be prohibited?
- Should CALs be limited in the total number of activities they conduct?
- If a CAL includes cultivation, how should canopy size be defined (e.g., mirror existing license sizes, create new size tiers, by square footage)?
- Should there be premises-related or other requirements specific to a CAL?
